NYACOL® DP6095

Colloidal Calcium Carbonate Dispersion in Ethylene Glycol

Nyacol® DP6095 is a sub-micron calcium carbonate dispersion in ethylene glycol recommended for use as an additive in PET for film or fiber production. The calcium carbonate is surface modified to provide excellent compatibility with the PET polymer. The use of 500 – 1000 ppm of DP6095 reduces the coefficient of friction to enable smooth running of films and fibers.
